

Bea Elaine S. Sapigao

West Rembo, Taguig City • beaelainee12@gmail.com • 09568016189

Education

JOSE RIZAL UNIVERSITY
B. S. in Information Technology

Mandaluyong, PH
June 2026

CENTRO ESCOLAR INTEGRATED SCHOOL
Science, Technology, Engineering, and Mathematics (STEM) Strand
Senior High School

Makati, PH
July 2022

BLOOMFIELD ACADEMY OF MAKATI
Junior High School

Makati, PH
March 2020

Experience

Office of the Election Officer - San Juan City
IT Intern and Graphics Designer

San Juan City, PH
January 2026 - May 2026

- Managed and optimized IT infrastructure by actively troubleshooting LAN server issues and executing the daily technical setup of computer peripherals across multiple satellite registration sites.
- Maintained high data integrity and security as a data encoder, accurately processing sensitive voter information, alphanumeric records, and biometric data into the primary database.
- Conducted initial eligibility interviews for voter applicants, ensuring strict compliance with registration protocols while delivering efficient, tech-supported public service.

LA LUNA (Undawn Group)
Social Media Manager and Graphic Artist

Remote
July 2023 - October 2023

- Managed and scheduled content across social platforms, ensuring consistent and strategic posting aligned with group goals.
- Designed and edited visually engaging videos, photos, and memes tailored for recruitment campaigns and community updates
- Contributed to the growth and visibility of La Luna by curating relevant, creative, and timely multimedia content

Projects

Aspect-Based Sentiment Analysis of Cosmetics Reviews for Informed Consumer Decision-Making Using the Sephora Product Dataset

February - April 2026

Languages & Tools: Python, BERT, PyTorch/TensorFlow, Pandas, NumPy, NLTK, Scikit-learn, Matplotlib, Seaborn

- **Problem Solved:** Addressed the "information accessibility gap" in digital commerce by transforming over 1.09 million unstructured, free-text Sephora customer reviews into granular, attribute-specific insights. This system prevents mismatched consumer expectations by allowing buyers to evaluate product attributes (e.g., shade accuracy across skin tones, formula compatibility with skin types, longevity, and packaging) without manually filtering extensive text.
- **Data Pipeline & Preprocessing:** Engineered a robust data ingestion and preprocessing pipeline to clean, tokenize, and lemmatize text data using NLTK. Handled extreme class imbalance (82.1% positive sentiment skew) through targeted data stratification and label engineering. Established empirical string-length filtering (>10 words) to optimize textual dataset quality.
- **Exploratory Data Analysis (EDA):** Conducted extensive statistical data analysis and visualization on customer demographics (skin tones, skin types) and product taxonomy across 8,494 products to map category-specific aspect frequencies and validate numerical star ratings as a reliable proxy for overall consumer sentiment.
- **Model Implementation:** Designed and validated an advanced Natural Language Processing (NLP) pipeline optimized for downstream fine-tuning of a BERT-based model with a strategic 128-token maximum sequence length constraint to balance computational efficiency and feature extraction accuracy.

Basic Dataset Implementation

November 2024

Languages & Tools: Microsoft Excel, Advanced Formulas (AVERAGE, MEDIAN, MODE), Data Ingestion, Data Preprocessing, Conditional Formatting, Statistical Benchmarking

- **Problem Solved:** Overcame the challenge of interpreting large, unorganized datasets by building a structured data preprocessing and descriptive analytics workflow. The framework streamlines raw data ingestion, handles inconsistencies, and applies statistical measures to transform transactional noise into clear, actionable data distributions.

- **Data Preprocessing & Structural Engineering:** Conducted comprehensive data cleaning, formatting, and structural preparation. Standardized raw attributes by implementing systematic sorting, removing structural duplicates, and correcting inconsistent data types to ensure total dataset integrity prior to analytical evaluation.
- **Descriptive Statistical Profiling:** Applied core measures of location and central tendency—specifically formulating AVERAGE, MEDIAN, and MODE functions—to establish empirical baselines. Successfully mapped data characteristics, such as calculating a segment mean of 451.28 and a median of 437.5, to pinpoint data distribution shifts and center points.
- **Conditional Formatting & Segment Filtering:** Designed multi-conditional logic filters and dynamic conditional formatting rules to visually isolate key metrics and positive response trends. This enabled immediate identification of statistical anomalies, outliers, and target demographics within the spreadsheet interface.

Student Organization

AWS Learning Club - JRU Ch.
Vice Chief of Operations

Mandaluyong City, PH
August 2026 - May 2026

- Co-led the Student Community Day in September 2025, managing ground operations and event flow for a large-scale student gathering.
- Collaborated on strategic event planning alongside the Chief of Operations to develop and execute technical learning initiatives.
- Provided high-level administrative support to the executive leadership to ensure all club projects met organizational standards and deadlines.

Achievements

Wadhvani Pitch Competition, 1st Runner-Up

April 2025

App: Safe Path

Group: <\nNExUS>, UI/UX Designer and Graphics Designer

CSE Week Technopreneurship, Best Booth

April 2025

App: Safe Path

Group: <\nNExUS>, UI/UX Designer and Graphics Designer

Certifications

CompTIA IT Fundamentals ITF+

December 2022

Skills & Interests

Technical: Intermediate Database Management, Intermediate Data Analytics, Microsoft Excel, Data Science Fundamentals, UI/UX Design (Figma), Graphic Design, Social Media Management

Soft: Fluent in Verbal/Written communication, Adaptability, Time Management, Creativity, Attention to detail, Decision-making, Active Listening

Tech Languages: Java, HTML, CSS, JavaScript, SQL, Python

Interests: Art, Music, Films, Self-help books
