Work Experience

PwC **June 2026 – Present**
Digital Solution Development Trainee *Philippines*

- Selected for a competitive trainee program to engineer enterprise-grade digital solutions within strict Big Four data governance and security protocols.
- Undergoing technical onboarding to collaborate with cross-functional teams in designing scalable workflows and data architectures.

UnionDigital Bank **Nov. 2025 – April 2026**
Data Intern (Under Data Architecture and Engineering) *Philippines*

- Engineered a Proof of Concept (PoC) and Source-to-Target Mapping (S2TM) for an Appsflyer API pipeline, implementing secure data flows and robust access protocols.
- Architected and deployed an end-to-end Zendesk CSV and API data pipeline, ensuring secure data ingestion and compliance to support record-breaking engagement growth (+330% vs. Q1 2025).
- Built PoC integrations for App Store, Google Play Console, and Huawei Console APIs, adhering to strict data validation parameters to safely capture a +225% increase in onboarded customers.
- Implemented SQL-based data quality checks across 1.4M+ records to identify anomalous field errors and vulnerabilities, reporting a 9% anomaly detection rate to the Data Governance Council.

Leadership Experience

AWS Student Builder Group - JRU **May 2026 – Present**
AWS Student Builder Group Leader | CEO *Mandaluyong, Philippines*

- Spearhead relationship management with industry sponsors and technical partners to secure resources for organizational growth and technology initiatives.
- Orchestrate AWS-focused cloud computing workshops, facilitating hands-on technical learning experiences including basic cloud security and infrastructure management for student members.

AWS Learning Club - JRU **Aug 2025 – May 2026**
Vice Chief of Relations *Mandaluyong, Philippines*

- Collaborated with the executive board to organize student-led cloud computing events and manage internal club relations.

Projects

Savie (Automated Finance Agent) | Go, GCP (Cloud Run, Secret Manager), JWT, APIs

- Secured an automated financial assistant pipeline by implementing JWT authentication flows and strictly managing sensitive API credentials within GCP Secret Manager.
- Architected a serverless backend in Go to process concurrent natural language queries via the Telegram Bot API, validating and parsing unstructured data into safe Go Structs.

KapeLink (Decentralized Escrow Layer) | Stellar Soroban, Blockchain, Cryptography

- Engineered a decentralized escrow layer leveraging Stellar Soroban to facilitate trustless, peer-to-peer transactions.
- Explored concepts of cryptographic identity validation, smart contract execution, and secure state management within a distributed ledger architecture.

Vento (Inventory Engine & API) | Go, PostgreSQL, REST APIs, AWS EC2

- Architected a highly concurrent in-memory backend engine in Go, processing high-throughput requests via custom, secure REST APIs without blocking the main thread.
- Deployed the backend worker on AWS EC2, integrating a write-behind logging persistence layer in PostgreSQL to ensure data integrity and rapid state reconstruction during server reboots.

Technical Skills

Identity & Security: JWT Authentication, API Security, GCP Secret Manager, Data Governance, RBAC Concepts, Trustless Systems

Cloud & Infrastructure: AWS (IAM, EC2, Lambda, S3, DynamoDB), GCP (Cloud Run), Docker, Vercel

Backend & Languages: Go, Python, C#, Java, SQL (Advanced), PHP

Data Engineering: ETL Pipeline Design, Data Quality Validation, Workflow Automation

Tools: Git/GitHub, Postman, Claude Code, Gemini CLI, REST APIs

Certifications & Training

Cloud & Data: AWS Academy Graduate (Cloud Foundations), AWS Cloud Quest, DataCamp Associate Data Engineer

IT & Development: Certiport IT Specialist (Java, Databases), CompTIA IT Fundamentals (ITF+)

Education

Jose Rizal University **2024 – Present**
Bachelor of Science in Information Technology *Mandaluyong, Philippines*
